

Rob Klopp of Elmer's Auto Body (Washington Twp., NJ)

The support and training from Till Paint Company and Akzo Nobel proved to be invaluable during our most recent transition to Waterborne paint. I cannot begin to describe how seamless this transition was. On top of that, the product is outstanding. Autowave is easy to use and the finish is even better than solvent-based paint. We are thrilled we made the switch to Autowave early in the process, not only are we producing a better finished product, but we are also protecting the environment.
